EXPERIENCED FIELD SERVICE TECHNICIAN – POWER GENERATION & ENGINES

Collicutt Energy Services | Red Deer, AB

Collicutt Energy Services is a solutions-driven engine company specializing in manufacturing, repair, overhaul, and maintenance of industrial engines and power generation equipment. We're known for quality workmanship, technical expertise, and delivering reliable solutions to our customers.

We are seeking an **experienced Field Service Technician** to support our Red Deer area customers. This is a hands-on, field-based role for a skilled Journeyperson who can independently diagnose complex equipment issues, complete repairs, and provide exceptional customer service.

We're looking for someone who's confident working independently, knows their way around diesel and natural gas engines, and enjoys the challenge of solving problems in the field. You don't need to be a Lead Technician, but you should have the technical experience, judgment, and initiative to handle demanding service calls with minimal supervision.

What's in it for you?

- Competitive wages plus overtime opportunities
- Company service truck
- Comprehensive group benefits
- RRSP matching program
- Stable, year-round employment
- Diverse equipment and challenging technical work
- Training and professional development opportunities
- Supportive, experienced Service team

What You'll Be Doing

- Diagnose, troubleshoot, repair, and maintain diesel and natural gas engines, generators, compressors, and related equipment.
- Perform startups, commissioning, calibrations, load bank testing, and equipment performance verification.
- Troubleshoot complex mechanical, electrical, pneumatic, and control system issues.
- Complete preventative maintenance, major repairs, and in-frame engine overhauls.
- Independently manage field service calls, identify repair requirements, and communicate findings and recommendations.
- Provide professional, responsive customer service while building strong customer relationships.
- Complete accurate service reports, timesheets, warranty documentation, and required records.
- Maintain service truck, tools, and equipment while participating in the on-call rotation and after-hours service.

What You Bring
Required:

- **Journeyperson certification** in Heavy Equipment Technology, Millwright, Automotive, Electrician, or an equivalent trade.

- **Minimum 5 years of field service experience** in power generation, gas compression, or a closely related industrial service environment.
- Advanced troubleshooting experience with diesel/natural gas engines, generators, and related mechanical, electrical, and control systems.
- Ability to read and interpret schematics, wiring diagrams, and technical documentation.
- Experience using diagnostic software and electronic troubleshooting tools.
- Ability to independently assess equipment failures and complete complex repairs.
- Strong communication, problem-solving, and customer service skills.
- **Valid driver's licence with a clean abstract.**
- Willingness to travel and participate in an on-call rotation.

Assets:

- Experience with CAT, Cummins, MTU, or other industrial engine platforms.
- Experience with commissioning, load bank testing, or generator controls.
- Experience troubleshooting pneumatic systems, regulators, or instrument controls.
- Experience mentoring junior technicians or apprentices.

How to Apply
