JUNIOR GENERATOR SERVICE TECHNICIAN

Collicutt Energy Services Inc. | West Sacramento, CA

About Us

Collicutt Energy Services is a solutions-driven engine company specializing in manufacturing, repair, overhaul, and maintenance of industrial engines and power generation equipment. We value safety, teamwork, continuous learning, and quality workmanship.

We are seeking a **Junior Generator Service Technician** to join our West Sacramento team. This is an excellent opportunity for someone with mechanical or electrical aptitude who wants to develop their skills working with industrial standby generators, diesel and natural gas engines, and related power systems.

You don't need years of generator experience to get started. We're looking for someone dependable, mechanically inclined, eager to learn, and comfortable working with customers. You'll gain hands-on experience alongside knowledgeable technicians while developing the skills needed to troubleshoot, service, and repair industrial generator systems.

What You'll Be Doing

- Assist with preventative maintenance, inspections, and repairs on industrial standby generators.
- Learn to troubleshoot diesel and natural gas engines, electrical systems, and generator controls.
- Support load bank testing and equipment performance inspections.
- Read and interpret wiring diagrams, schematics, and technical documentation.
- Assist with diagnosing equipment failures and identifying repair requirements.
- Complete accurate service reports, inspection records, and work documentation.
- Maintain tools, equipment, and a safe, organized work environment.
- Provide professional customer service while supporting field service operations.

What You Bring

Required:

- High school diploma or equivalent.
- Basic mechanical or electrical knowledge gained through education, training, or practical experience.
- Strong interest in industrial engines, generators, and technical troubleshooting.
- Basic computer skills and willingness to learn diagnostic software.
- Strong problem-solving skills, attention to detail, and mechanical aptitude.
- Dependable, safety-conscious, and comfortable learning from experienced technicians.
- Professional communication and customer service skills.
- Ability to work Tuesday–Saturday and participate in on-call rotations as required.

Preferred:

- Diesel engine, automotive, electrical, or mechanical technical training.
- 0–2 years of relevant mechanical, electrical, or equipment service experience.
- Familiarity with generators, diesel engines, electrical controls, or wiring diagrams.
- Previous hands-on shop, maintenance, or field service experience.

What's in it for you?

- Competitive hourly wages based on experience
- Company benefits for eligible full-time employees
- Hands-on technical training and mentorship
- Exposure to CAT, Cummins, Kohler, MTU, and other industrial engine platforms
- Stable, full-time employment
- Opportunity to build a long-term career in power generation

How to Apply

Submit your resume to **hr@collicutt.com** with **Junior Generator Service Technician – Sacramento** in the subject line or apply directly through Indeed.

We wish to express our thank you to all applicants for their interest and effort in applying for the position; however; only candidates under consideration will be contacted.

Collicutt Energy Services Inc. is an equal opportunity employer.
