

ENGINEERING TECHNOLOGIST (C.E.T. / M.E.T REQUIRED)

Collicutt Energy Services is a solutions-driven engine company specializing in manufacturing, repair, overhaul, and maintenance across all engine brands. Our Manufacturing team designs and builds custom power generation solutions that support customers across multiple industries. We pride ourselves on delivering high-quality solutions through technical expertise, collaboration, and continuous improvement.

We are currently seeking an **Engineering Technologist** to join our **Manufacturing team in Red Deer**. This is a multidisciplinary role that combines **estimating, engineering design, project coordination, procurement, and technical support**. You'll work closely with Sales, Manufacturing, Operations, vendors, and customers to develop practical engineering solutions and successfully deliver custom power generation projects.

What's in it for you?

- Competitive compensation
- Comprehensive group benefits
- RRSP matching
- Opportunity to work on custom power generation projects
- Collaborative, cross-functional work environment
- Professional development and career growth
- Stable, growing organization

What you'll be doing

- Prepare detailed project estimates, proposals, and quantity take-offs
- Develop mechanical, electrical, and hydraulic design solutions
- Interpret specifications, drawings, P&IDs, and engineering documentation
- Coordinate projects from quotation through manufacturing and delivery
- Provide technical support to Sales, Manufacturing, Operations, vendors, and customers
- Coordinate procurement activities and evaluate supplier quotations
- Monitor project schedules, budgets, and progress while providing regular updates
- Identify opportunities to improve engineering processes, estimating accuracy, and operational efficiency

What you bring

Required

- **Certified Engineering Technologist (C.E.T.) or Mechanical Engineering Technologist (M.E.T.) designation**
- Experience preparing cost estimates, proposals, and technical documentation
- Strong understanding of mechanical, electrical, and hydraulic systems
- Ability to read and interpret engineering drawings, P&IDs, schematics, and specifications
- Strong project coordination, planning, and organizational skills
- Proficiency with Microsoft Office and Microsoft Project
- Excellent analytical, communication, and problem-solving skills
- Valid driver's license and ability to travel occasionally

Assets

- Experience with power generation equipment
- Experience estimating diesel, natural gas, or standby generator projects
- Experience working with ATS, switchgear, control systems, or sound-attenuated enclosures
- Experience supporting manufacturing or custom equipment projects

Work Environment

- Office-based position with regular interaction with the manufacturing shop
- Occasional travel to customer sites and project meetings
- Collaborative work with internal departments, vendors, and customers
- Combination of estimating, engineering, project coordination, and technical support responsibilities

How to Apply

Submit your resume to hr@collicutt.com with **Engineering Technologist** in the subject line.
