EXPERIENCED GENERATOR SERVICE TECHNICIAN
Collicutt Energy Services Inc. | West Sacramento, CA

About Us
Collicutt Energy Services is a solutions-driven engine company specializing in manufacturing, repair, overhaul, and maintenance of industrial engines and power generation equipment. We value safety, technical expertise, teamwork, and delivering reliable solutions to our customers.

We are seeking an **Experienced Generator Service Technician** to join our West Sacramento team. This position is suited to a skilled technician who can independently diagnose, troubleshoot, maintain, and repair industrial standby generator systems ranging from **5 kW to 3,200 kW**.

We're looking for someone with strong diesel and natural gas engine experience, advanced electrical troubleshooting skills, and the confidence to manage challenging service calls. **You should be comfortable diagnosing problems independently, communicating with customers, and taking ownership of repairs from start to finish.**

What You'll Be Doing
- Diagnose, troubleshoot, repair, and maintain industrial standby generator systems.
- Perform preventative and corrective maintenance on diesel and natural gas engines.
- Troubleshoot AC/DC controls, electrical systems, automatic transfer switches, and control logic.
- Perform load bank testing and verify equipment performance using established procedures.
- Read and interpret electrical wiring diagrams, schematics, and technical documentation.
- Independently assess equipment failures and recommend appropriate repairs.
- Complete accurate service reports, inspection documentation, and required records.
- Provide professional customer service while maintaining safe work practices.

What You Bring
Required:
- **Minimum 5 years of experience in the backup generator industry.**
- High school diploma or equivalent.
- Graduation from a Diesel Engine Training Program.
- Strong experience troubleshooting industrial diesel and natural gas engines.
- Ability to diagnose electrical, mechanical, and generator control system issues.
- Ability to read and interpret wiring diagrams and electrical schematics.
- Strong independent troubleshooting, problem-solving, and decision-making skills.
- Excellent customer service, communication, and organizational skills.
- Ability to work Tuesday–Saturday and participate in on-call rotations as required.

Preferred:
- Experience with CAT, Cummins, Kohler, Detroit/MTU generator systems.
- Experience with Waukesha natural gas engines and prime power applications.
- Knowledge of industrial engine fuel systems and controls.
- Experience troubleshooting automatic transfer switches and control logic.
- Experience with generator load bank testing and commissioning.

What's in it for you?

- **$36.80–$50.00 USD/hour**, based on experience and qualifications
- Company benefits for eligible full-time employees
- Stable, year-round employment
- Diverse industrial generator and engine platforms
- Challenging technical work with independent responsibility
- Training and professional development opportunities
- Supportive, experienced Service team

How to Apply

Submit your resume to **hr@collicutt.com** with **Experienced Generator Service Technician – Sacramento** in the subject line.

We wish to express our thank you to all applicants for their interest and effort in applying for the position; however; only candidates under consideration will be contacted.

Collicutt Energy Services Inc. is an equal opportunity employer.
